

Project Overview

As of April 30, 2013

Lincoln Theatre Area Improvements - Phase 2 - Long Street, Hamilton to Garfield

Description and Benefits:

The city of Columbus has completed plans for Phase 2 of improvements to the historic Lincoln Theatre area. Work in this phase will create a gateway to the King-Lincoln District, upgrade roadway facilities, enhance pedestrian safety features and update overhead utilities and street lighting.

Improvements include:

- Relocating overhead utility lines to underground
- Replacing existing traffic signal and wires at Long Street & Hamilton Parkway with cantilevered, mast-arm poles
- Adding pedestrian countdown timer crossing signals at Long Street & Garfield Avenue
- Removing existing street lights and installing an additional ornamental lighting system
- Upgrading traffic signage
- Improving curbs and sidewalks and adding *Americans with Disabilities Act*-compliant curb ramps

Schedule:

Construction in progress and will finish in Spring 2014, weather permitting.

Costs:

Design	\$240,000.
Construction	\$1.5 million

Contact Information:

City of Columbus Project Manager for construction: Steve Wasosky, P.E., tel. (614) 645-3183

Designer: Columbus Engineering Consultants, Inc.

Construction Contractor: Danbert, Inc.
